PROBLEM

Despite the spread of delivery apps and companies in recent years, safety remains a major challenge for girls who rely daily on these means to commute to university, work, or various errands. Many of them have faced harassment and unsafe situations, and in some cases, matters escalated to unfortunate crimes due to weak driver monitoring and the absence of effective trip-tracking systems. Incidents reported in the media have proven that the problem is no longer individual but has become a societal issue directly affecting girls' sense of safety, making many hesitant to use such services.

Although women are the most exposed to these risks, transportation dangers are not limited to them; they can affect anyone in society. Therefore, the company's services are not limited to women only but provide services for everyone with strict requirements and standards for driver acceptance to ensure safe and reliable service for all users.

SOLUTION

The need arose to establish a specialized safe transportation app under the name **Amango**, which prioritizes safety and privacy and relies on modern technology for real-time trip monitoring and quick response to any potential threat, providing a safer and more comfortable environment.

TARGET AUDIENCE

1-Women and girls who prioritize safety and comfort in their daily commute

2-Parents who want a trusted service transport their children to school or activities

3-Families looking for a safe and depend mobility option for everyday outings

General Features

1. **Live Tracking:** Share the trip with family or friends with alerts in case of route deviation or stops in unsafe areas.
 2. **SOS Button:** Send real-time location, driver information, and live recording to emergency authorities.
 3. **Guardian Mode:** Parents can monitor the trip in real time with arrival notifications.
 4. **Driver Safety Rating System:** Rating based on safety and rule compliance, not just service quality.
-

Special Features for Women

1. **Ladies-Only Ride Option:** Ability to choose a female driver for all transport modes (Car – Scooter – Minibus).
 2. **Lady Scooter:** A flexible and fast transportation mode driven exclusively by female drivers.
 3. **Trip Recording:** Automatic audio or video recording stored on the cloud to ensure safety and evidence when needed.
 4. **Stealth Alert:** Activate emergency mode by shaking the phone or using a secret voice command without drawing attention.
 5. **Safe Zones:** A map showing the safest places to drop off or wait, especially at night.
-

Innovative Solutions by Amango

- **Guardian Mode** with direct voice call feature.
 - **Lady Scooter** dedicated for women only.
 - **AI Driver Behavior Monitoring** (speed, stops, suspicious behavior).
 - **Voiceprint Emergency Activation** working as a secret distress button.
 - **Anti-Harassment Protection:** Any confirmed incident results in immediate permanent driver ban and reporting to authorities.
-

Amango Project Deliverables

1. Brand Identity

- Main Company Logo.

2. Print Materials

- Service Brochure.
- Awareness Posters.
- Car Stickers.
- Business card

- Magazine

3. Digital Design

- **UI Screens:**
 - Login Screen.
 - Ride Selection.
- Social Media Ads

4. Merchandising

- Tote Bag or Keychain with company logo.
 - Sticker Pack.
-

Amango Message

*"A Safe Journey for You... and Peace of Mind for
Everyone."*
